Bachelor of Technology (Information Technology)
Relevant Courses: Object Oriented Programming, Data Structure, DBMS, Operating System
Karimpuzha HSS -2016-2018
Higher Secondary Education (Science)
Percentage: 96

Experience

Web Development Intern at Internship Studio : Currently working as a web developer intern, contributing to the design and development of web applications. Primarily focusing on front-end development, contributing to the design and user experience of web applications using HTML, CSS, JavaScript, and frameworks like Bootstrap

Projects

Academic Projects

- Eye Commerce - Main Project**
Developed an eye-controlled cursor movement system for an e-commerce platform, enhancing accessibility for individuals with limited mobility by enabling navigation and purchase solely through eye movements

Hobby Projects

- Yelp-Camp**
YelpCamp is a web application developed using HTML, CSS, JavaScript, Express, Node.js, and MongoDB. It allows users to browse, add, and review campgrounds with integrated authentication
- Image Search**
Image Search is a web application that allows users to search for images by keywords, displaying relevant results using an external API. Built with HTML, CSS, JavaScript, and integrated with an image API for fetching data
- iChat**
iChat is a real-time chat application built using Node.js, Express, and Socket.io. It allows users to communicate instantly with each other in chat rooms
- Youtube Clone**
Built a YouTube clone using React.js with key features like video playback, search, and a mobile-friendly design. Focused on creating a smooth user experience with well-organised components and effective data handling
